Restoration^{PRO}[®]

Omegasonics — the leader in ultrasonic cleaning systems with over 50 years of ultrasonic cleaning experience introduces the **Restoration Pro[®]** System, specifically engineered and designed to increase the efficiency of processing fire, smoke, mold and water damaged contents.

Restoration Pro[®] delivers these benefits and more:

- Dramatically increases process efficiency
- Reduces overhead by eliminating 80% of hand-cleaning
- Improves cleaning quality
- Reduction in breakage
- Consistent cleaning results
- Increases recovery rate for revenue growth
- Increases production volume and profits

Restoration Pro[®] is a Complete System integrating Ultrasonic Technology, New Management and Organizational Strategies to give you the Advantage to achieve unprecedented efficiency and production speeds.

Restoration Pro[®] provides more standard features than anyone in the industry.

- Low liquid level sensor protection
- Lower profile for technician safety
- Truly portable with self-contained generators
- Auto-Fill option
- Two (2) year bumper-to-bumper warranty

Station #2: 5200PW Pre-Wash

Effectively removes heavy residue and contaminants prior to the ultrasonic process

Station #3: 5224UW Ultrasonic

Precision cleaning of delicate and intricate surfaces impossible to clean by traditional methods

1 Station #1: Unpacking

Equipment space as shown: 28' x 18'

Achieve Optimum Contents Cleaning Efficiency

Station #4: Rinse-Detail

Provides final rinse and staging of up to six (6) baskets prior to the drying process

Station #5: 6900TD Tunnel Dryer

Thoroughly dries three (3) baskets of contents in five (5) minutes or less

Station #6: Repacking

6

The Restoration Pro[®] System delivers a proven, fail-safe, step-by-step productivity enhancing workflow providing restorers with the tools required to dramatically increase production and profitability.

Advantages of a Restoration Pro[®] System Facility:

- Projects professionalism
- Instills confidence with adjusters
- Maximizes efficiency in the handling and processing of contents
- Promotes efficiency with employees
- Provides management control of all processes
- Enhances workflow
- Presents a showcase facility

Cleaner

C O N T E N T S

Restoration Pro® provides you with a clear, competitive advantage.

The **Restoration Pro®** Ultrasonic Cleaning System eliminates the hours of hand-work required to restore general and specialty items, while dramatically increasing the number of items that can be restored.

The **Restoration Pro®** System quickly restores hard surface items such as crystal, china, ceramics, Hummels, ornaments, jewelry, glass, porcelains, and rust-damaged tools, as well as restoring metals, silver, pewter, brass, silk plants, blinds, plastics, tupperware, and stuffed animals.

Ideally suited for safely cleaning electrical tools, appliances, firearms, light fixtures and chandeliers.

In addition to removing smoke residues, carbons, heat scale and oxides, the **Restoration Pro®** System has proven to be extremely effective at reaching and removing microscopic dust and soot from the smallest nooks and crannies hand cleaning cannot.

Greater Recovery, Fewer Discards

By recovering more items in less time, you will save time, money and hassles for everyone affected by the damage.

**Erase the Effects
of Fire Damage—
Quickly, Thoroughly,
and Inexpensively**

Decrease Cash-Out

Become the fire restoration company of choice for more insurance adjusters. Our sought-after technology allows you to restore items your competition can't, giving you a clear competitive advantage.

T E S T I M O N I A L S

"The benefits of our ultrasonic cleaning equipment are tremendous. Omegasonics is great! Their support and training is excellent. Our system allows us to clean products and cut our processing time over 50% versus conventional methods.

We've done jobs that couldn't be completed without the equipment. We did \$65,000.00 in change from a bank flood that was cleaned and sanitized. We also did over 1000 models for a dentist of teeth that were plaster molds."

—Robert Contraguerro Jr., Panhandle Restoration

"We have easily increased what we can salvage by almost 50% and have become a lot more profitable.

Our contents division is growing because we now have a way to market our services.

What I would tell anyone in the restoration business is the equipment saves money, cleans better, faster, and is a heck of a marketing tool!"

—Doug Blount, Paul Davis Restoration

"We're able to clean contents so much faster with the ultrasonics. We're doing ten times what we were doing before.

It's the best thing I've ever bought for restoration. It's that impressive."

—Derek West, Service Team of Professionals

Customized Training and Education

Omegasonics offers the most comprehensive education and training program for fire and water loss content cleaning. Ultrasonics is one of the most efficient restoration methods and many items previously considered a loss by insurance companies can now be effectively restored. Let us teach you how to turn content problems into profitable solutions.

Our training programs can be held at your facility or at our fully-equipped and functional training facility specifically designed for hands-on training in Contents and Electronic cleaning.

Obtain the knowledge and capability required to address all relevant content cleaning applications in a safe and expedient manner.

Earn 1-2 IICRC Continuing Education Credits

Training and Education topics include:

- **Eliminate the wasted time associated with using outdated contents management and processing methods by providing you with the tools required to dramatically increase the efficiency of your contents operation and increase productivity**
- **Learn how to process and restore antiques, china, jewelry, firearms, power tools, stuffed toys, electronics, artificial plants, chandeliers and more based on the item's durability, material make-up and level of contamination**
- **Proper inventory and pack-out procedures ensure accurate estimating and billing, in addition to enhancing process efficiency.**

Aqueous Cleaning Systems & Drying Chambers

The **Restoration Pro**® Electronic Restoration System provides safe, effective processing of delicate electronic equipment and components. Electronics such as tube style televisions, monitors, computer routers, oscilloscopes, electrical meters, flat bed scanners and other high dollar products can be restored for much less cost than replacement.

The **Restoration Pro**® **Electronic Cleaning Station** uses de-ionized water combined with specialized detergents to successfully restore electronics previously deemed non-salvageable. This process removes dirt contaminants and smoke residue from a variety of electronic items as well as increasing calibration accuracy.

The **Restoration Pro**® **Electronic Drying Chamber** maintains proper temperature, fresh air exchange and deodorized air flow, opening pores in electronic components to facilitate the complete elimination of odors and thorough drying of electronic components.

TESTIMONIALS

"We have had great success with restoring electronics. At first we were skeptical, but with excellent support from Omegasonics, we are achieving revenues that in the past were not even imaginable. It's a fast, easy process."

—Steve Pynor, LDR Construction

"We did a job recently for a submarine company in Hawaii. They sent us a number of circuit boards from the submarine controls that were badly damaged in a fire. The client was amazed at how clean the boards came back and how well everything worked. We saved them a ton of money, and made a very healthy profit ourselves thanks to Omegasonics."

—Ken Lehman, Steamatic of North Las Vegas

"We have found the electronics cleaning package to be a great benefit to our business. In the past, insurance companies would total loss electronics. Now in a few minutes we can completely restore these items. It is really a simple process."

—Tony Roberts, ServPro of Pulaski & Laurel Counties

A profitable solution for your business

Restoration Pro® Electronic Restoration Systems provide more advantages than competitive brands.

- **Lower profile control access for personnel safety**
- **Fully removable control station for cost-effective cleaning of large appliances**
- **Front access air regulation for more controlled cleaning**
- **Time controlled cycle dry time for energy efficiency**
- **Two (2) year bumper-to-bumper warranty**

Through our ongoing association with the most innovative companies in the restoration industry, Omegasonics continually improves product offerings and processing techniques to help our clients improve bottom line profitability.

Whether you are looking for training, equipment support, content support or help with any aspect of your contents division, Omegasonics is well-staffed to meet your needs. Our staff of restoration professionals has over 50 years of knowledge in the ultrasonic and electronic restoration industry.
